SAP Analytics Cloud Training

"Move from 'I can build stories' to 'I can build scripted applications, forecasts, and scenario models that clients pay a premium for.'"

Prerequisite: solid SAC literacy — comfortable building stories, models & basic planning apps already. Still learning story vs. model? Start with the Foundational path first.

SAC CONSULTANTS, 1-3 YEARS

SAC Mastery: Scripting, Predictive & Advanced Planning

For SAC consultants who can already build stories and basic planning, but want to own the complex pieces of a project — scripting, predictive analytics, and advanced driver-based planning.

STARTS

6-WEEK CURRICULUM

- Week 1** Advanced SAC Architecture & Performance
- Week 2** Smart Insights, Smart Discovery & Business AI
- Week 3** Predictive Analytics with Smart Predict
- Week 4** Analytics Designer Foundations
- Week 5** Advanced Scripting Patterns
- Week 6** Advanced Driver-Based Planning & Capstone

WHY THIS COURSE

Expert-level range

Scripting and predictive are what separate a confident SAC user from a true specialist.

Real forecasting & planning

Build on real business datasets — not toy demos.

Built for consultants

Leave with a capstone you can adapt directly to client engagements.
