DATA & PLATFORM ENGINEERS

SAP Analytics for Data Engineering

Engineer the data layer behind analytics — build production-ready CDS views and SAC stories across Finance, Supply Chain, Sales, HR, and more.

MODULE 1

SAP BDC & Datasphere Foundations for Analytics

Connect, model, and govern enterprise data in Datasphere across multiple LOBs — the entry point into SAP's modern data landscape.

3 weeks · Beginner

\$120

MODULE 2

Embedded Analytics & CDS Views for SAC

Build lean CDS views per LOB — FI, SCM, Sales, HR — and expose them for embedded analytics directly inside S/4HANA.

3 weeks · Intermediate

\$150

MODULE 3

From Datasphere & CDS to SAC Stories

Turn engineered data into business-ready stories — a capstone combining a Datasphere model with a live CDS-based source.

2 weeks · Beginner-Intermediate

\$95

Full Bundle — All 3 Modules

8 weeks total. The complete picture of how SAP's modern data platform connects.

Regular \$365 · Save \$66

\$299

WHY THIS PATH

How the stack connects

See how BDC, Datasphere, embedded analytics, and SAC fit together.

Modular by design

Take one module for a specific need, or the full bundle.

Real CDS view work

Ship views you'd actually use in an S/4HANA environment.

Multi-LOB by default

Finance, Supply Chain, Sales, HR — reusable patterns, not one report.

From \$95 per module · \$299 bundle
